TEMPORARY POWER APPLICATION/PERMIT

I/We, the undersigned request temporary electrical power for construction purposes only.

PERMIT #: _____ ACCOUNT #: _____ (if applicable)

DATE: _____

OWNER: _____

The Inspection Department shall have the electricity disconnected in case of a hazard, illegal occupancy of the building, or the inability, caused by others to make proper inspections. The Inspection Department reserves the right to have the power disconnected for violation of the above without prior notice to the owner or their agent.

The applicant has secured written permission from the other contractor's involved in this project and they are aware that power is being connected to this building.

Portions of the electrical system to be energized are limited to LIGHTS, EQUIPMENT, AND OUTLETS PROTECTED BY GFCI (ground fault circuit interrupters).

Deviation from the above use restrictions or from the applicable codes will result in the disconnection of the power and refusal of future temporary power request.

Temporary power is issued for thirty (30) days only. Temporary power may be extended for additional thirty (30) day intervals, if justified, for an additional fee per extension. It is the owner/applicant's responsibility to apply for an extension. Temporary power, which has not been extended, will be disconnected without further notice (per section 309.6.4.11 Volume 1-A). My signature below indicates I have read, understand, and agree with the conditions outlined above.
